

Installation and howto for Meet-O-Meter

Installation

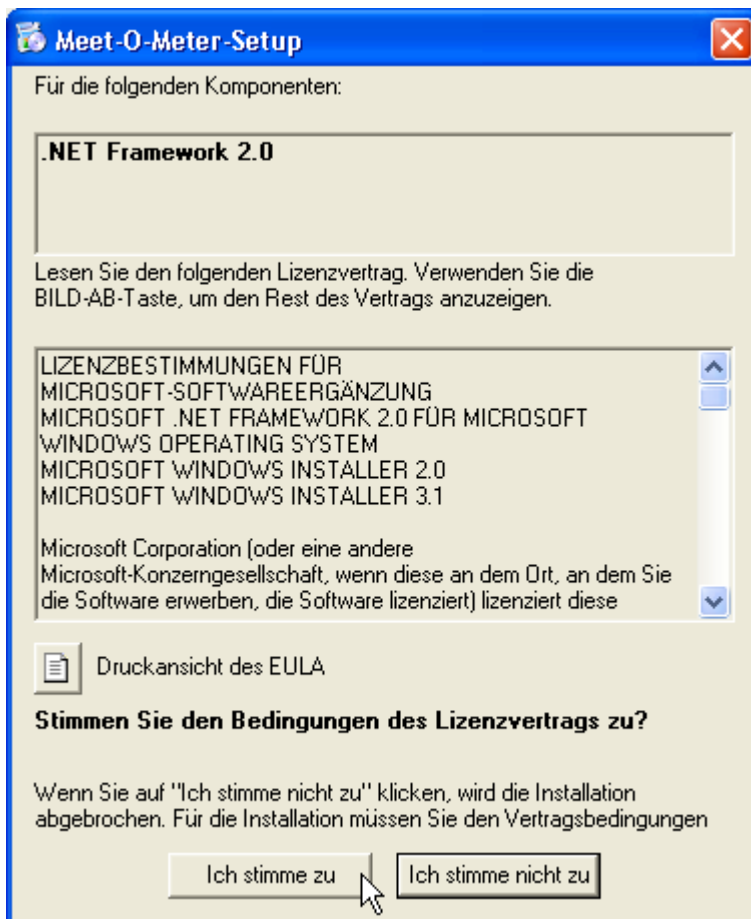

1. Click Meet-O-Meter.exe

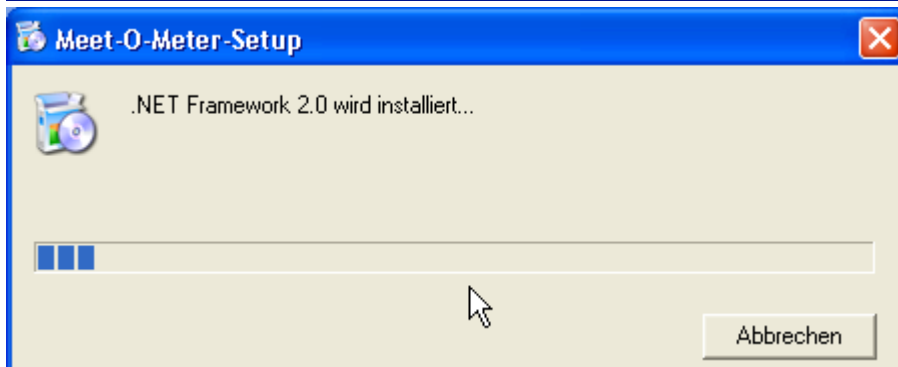

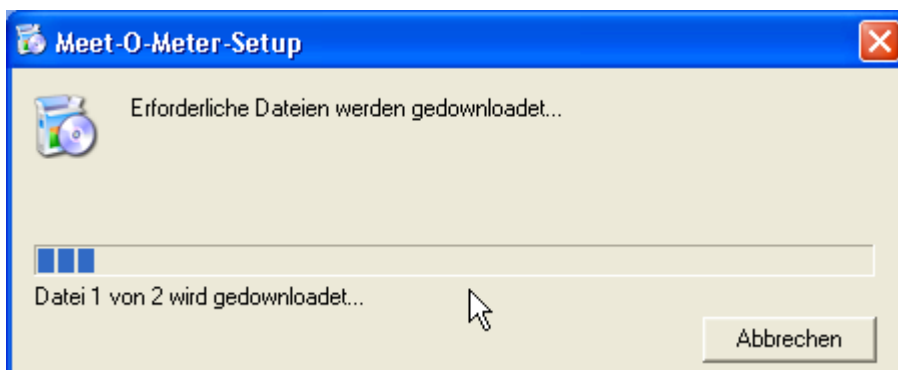

Start the installation by double-clicking on the .exe.

2. Install .NET 2.0, if necessary.

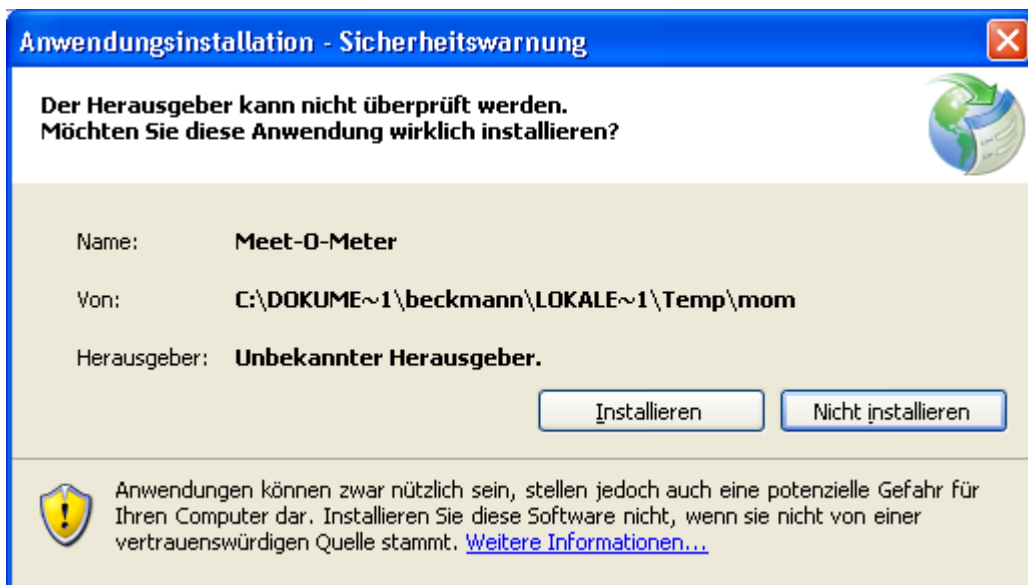

You'll need an internet connection for this.

If you accept the .NET terms of license, .NET will be downloaded and installed.

Installing Meet-O-Meter

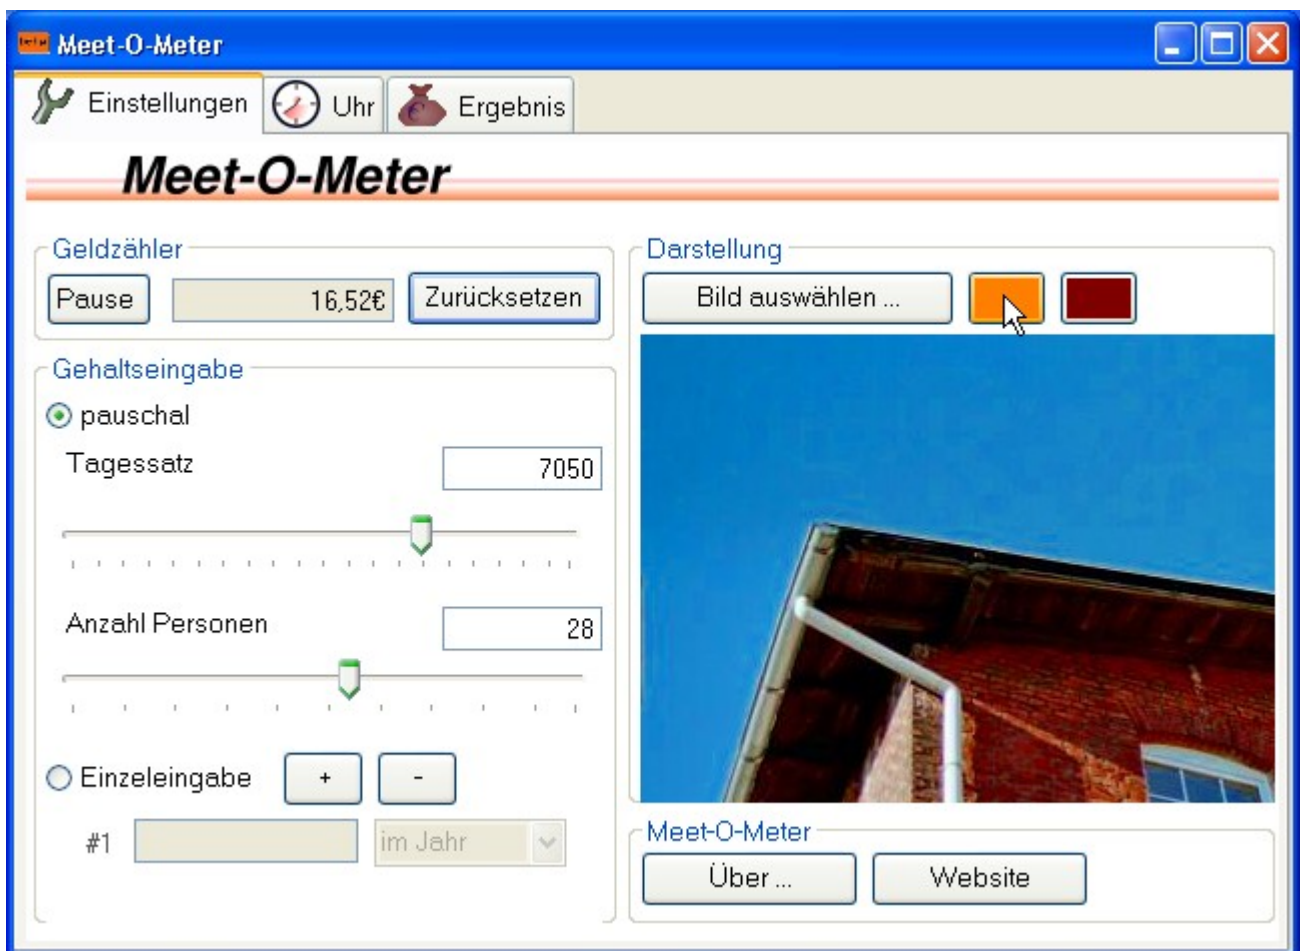

If you click on "Install" Meet-O-Meter will be installed on your hard drive.

Next, the program starts with the settings-view.

Howto

1. Settings

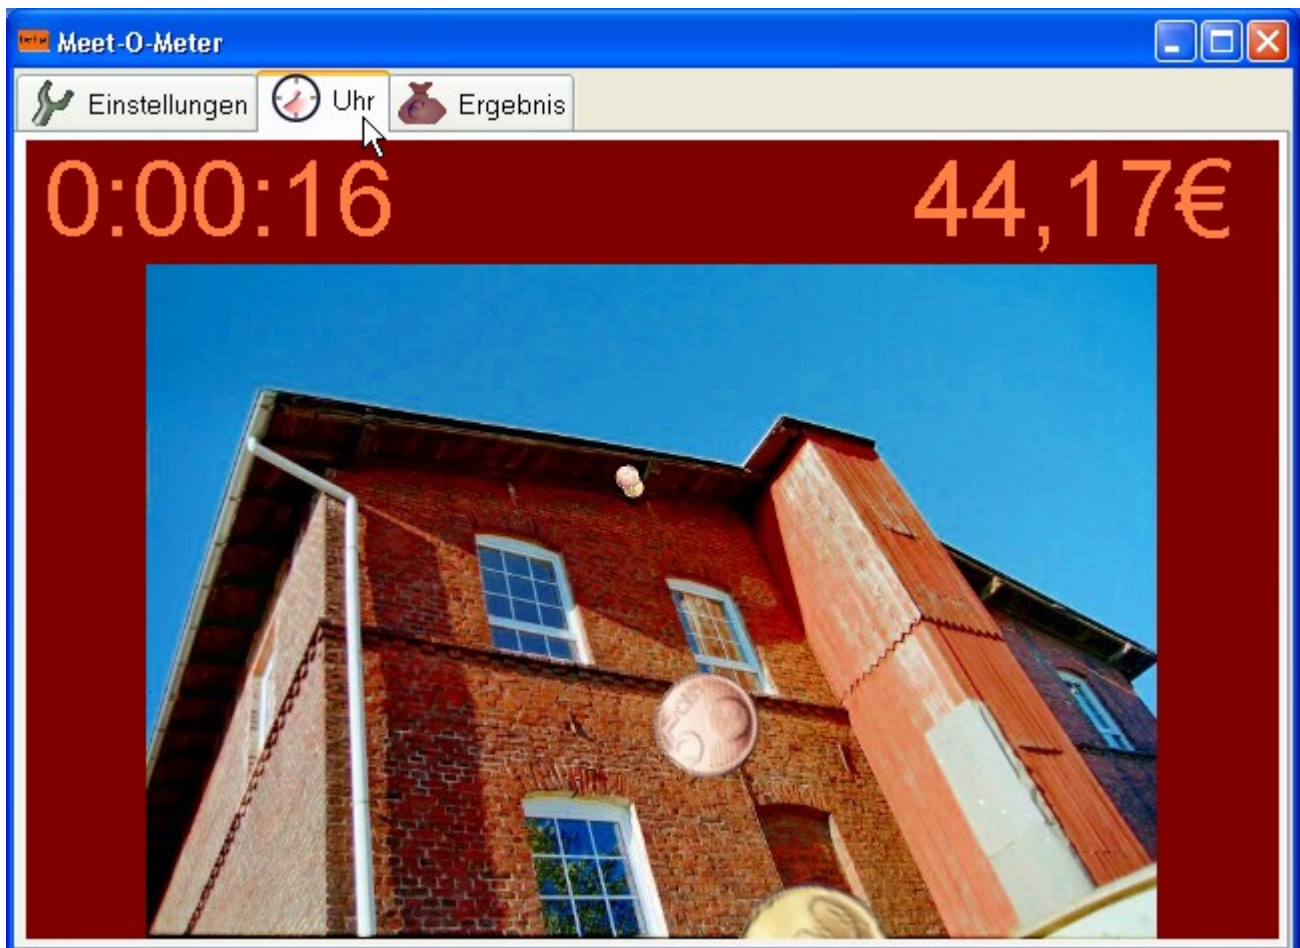

Input the average daily rates of the participants or the anonymous salary of each person. You can change the colors displayed, if you'd like to. To do this, choose "Change color" and select another color from the color chooser.

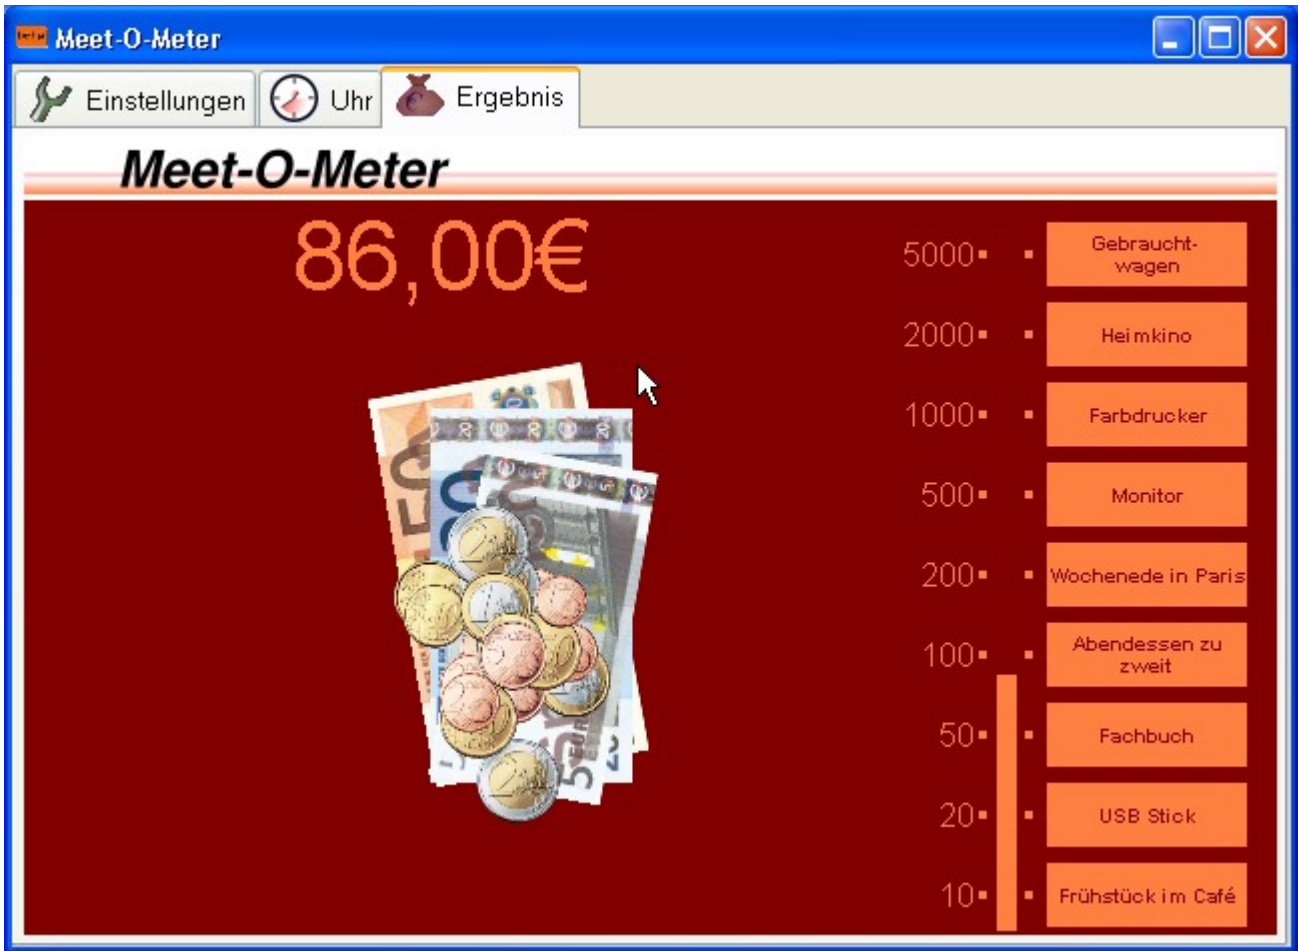

Change the picture in the background by clicking on "Choose picture" and selecting a different file from the harddisk.

2. The clock's ticking

When you switch to the Clock-view, the clock actually starts and **Meet-O-Meter** starts counting money.

3. Result

When you click on "Result" you'll see the whole sum that has been "burned", until now displayed as a heap of money.
